Ana Júlia Rocha Gaspar

FULL STACK DEVELOPER

São Paulo, Brazil · +55 (14) 99808-6468 · ana.jr.gaspar@gmail.com · linkedin.com/in/ana-julia-gaspar · github.com/Najuzinh4

Full stack developer with experience across Python, C#/.NET, TypeScript/JavaScript, React, Angular, and Node.js/NestJS, built at BTG Pactual and VR Software. Comfortable owning features end-to-end, from REST API design to frontend implementation, with a growing specialization in AI/LLM engineering through FastAPI, LLM API integration, and prompt engineering. Currently completing a Bachelor's in Information Systems at UNESP.

CORE COMPETENCIES

- **Full Stack Development:** Python, C#/.NET, TypeScript/JavaScript, React, Angular, Node.js/NestJS
- **AI/LLM Integration:** FastAPI, OpenAI API integration, prompt engineering (built PlanejAI, an AI-powered study planner, as a graduation project)
- **Cloud & Automation:** AWS (Lambda, CloudFormation, Athena, SQS, S3), Azure, RPA-driven process automation
- **Backend Architecture & APIs:** REST API design, microservices, RabbitMQ messaging, PostgreSQL/MySQL/SQL Server
- **DevOps & CI/CD:** Docker, Jenkins, Git, SonarQube, deployment automation

PROFESSIONAL EXPERIENCE

Full Stack Developer (Mid-Level) — VR Software 2025 – 2026 | Brazil

- Evolved a retail ERP used by major retail chains: developed APIs in NestJS and features in Angular/TypeScript within a microservices architecture (RabbitMQ, Docker, Jenkins, SonarQube, Redis)
- Migrated functionality from a legacy system to the modern NestJS architecture, analyzing business rules to preserve behavior
- Investigated and resolved production bugs; performed business rule analysis and code review
- Helped test and refine the team's Claude Code instruction files (CLAUDE.md) to make AI-assisted development more consistent with project standards

Full Stack Developer (Python/React/AWS) – Automation Ops — BTG Pactual

2024 – 2025 | Brazil

- Ramped up on Python with no prior professional experience and built production automation used internally by the bank
- Built Xereta, a Python/React platform monitoring 100+ internal accounts in near real time using parallel processing, replacing a manual process and becoming the bank's standard solution
- Automated a regulatory reporting process using the Douglas-Peucker algorithm, cutting a 4+ hour manual task to minutes
- Worked extensively with AWS (Lambda, SQS, CloudFormation, Athena, S3), CI/CD pipelines, and agile Scrum delivery

Full Stack Developer (.NET) — Moovefy 2023 – 2024 | Bauru, Brazil

- Developed product enhancements using C# and JavaScript, working directly with clients to implement tailored solutions
- Debugged and resolved production issues; worked with SQL databases and CRM integrations in B2B implementations

EDUCATION

Bacharelado em Sistemas de Informação — UNESP 2022 – 2026 | Bauru, Brazil

In progress, expected late 2026. Thesis: "PlanejAI" — an AI-powered study planner (FastAPI, React, PostgreSQL, LLM integration).

Técnico em Informática — Etec Rodrigues de Abreu 2018 – 2020 | Bauru, Brazil

Technical course in Information Technology integrated with high school.

LANGUAGES

Portuguese (native), English (advanced), Italian (beginner), Japanese (learning).
