DevOps & Tools: CI/CD Pipelines, Docker, Git, Deployment Automation
Other: RPA, CRM Systems, AI-assisted development, Process Automation
Languages: Portuguese (Native), English (Advanced), Italian (Beginner)

CERTIFICATES

C# COMPLETE Object-Oriented Programming + Projects Udemy 2023

C#: consuming API, saving files, and using LINQ Alura Certificate issued in Apr 2024

C#: mastering Object-Oriented Programming Alura Certificate issued in Apr 2024

Mastering Entity Framework Core Desenvolvedor.io Certificate issued in Aug 2023

Introduction to Entity Framework Core Desenvolvedor.io Certificate issued in Aug 2023

Cit and Github: branching strategies, Conflicts, and Pull Requests Alura Certificate issued in Nov 2023

Git and GitHub: sharing and collaborating on projects Alura Certificate issued in Nov 2023

Java JRE and JDK: compile and run your program Alura Certificate issued in Nov 2022

Java OO: understanding Object-Oriented Programming Alura Certificate issued in Dec 2022

FORMATION

College education
UNESP | Bacharelado em Sistemas de Informação - Bauru
2022 – PRESENT (final year)
Advanced English- private lessons
2023 - 2024
Technical education
Ensino Médio e Técnico | Informática
Etec Rodrigues de Abreu - Bauru
2018 - 2020
British English - Cultura Inglesa
2014 - 2017

EXPERIENCES

Full Stack Developer (Mid-Level)
VR Software — October 2025 – Present

- Developing and maintaining full stack applications using Angular and TypeScript on the frontend and Node.js/NestJS APIs on the backend.
- Implementing new features and improvements across retail platform modules, working on both frontend interfaces and backend services.
- Designing and integrating REST APIs, debugging issues and ensuring system stability.
- Leveraging AI tools and intelligent agents to improve development workflows and automate repetitive tasks.
- Contributing to internal developer productivity by proposing tools and improvements for the engineering team.

Full Stack Developer (Python/React/AWS)
BTG Pactual — June 2024 – June 2025

- Developed end-to-end solutions for internal process automation with agile delivery.
- Built full stack applications using React and Python, integrated with AWS services (Lambda, CloudFormation, Athena, Lake Formation, cron jobs).
- Implemented CI/CD pipelines with automated deployments and serverless architecture.
- Automated processes using RPA to increase efficiency.
- Worked in agile squads (Scrum) throughout the entire project lifecycle.

ANA JÚLIA ROCHA GASPAR

Full Stack Developer

CERTIFICATES

C: advancing in the language Alura Certificate issued in Dec 2022

Complete Modern Web Development Course with JavaScript 2022 + Projects Udemy 2023

For the full list, please check the certifications section on my LinkedIn profile.

EXPERIENCES

.NET Full Stack Developer

Moovefy - August 2023–June 2024

- Developed product enhancements using C# and JavaScript.
- Debugged and resolved production issues.
- Worked with SQL databases and CRM integrations.
- Participated in B2B product implementations using Kanban methodology.

IT Java Intern

Lecom Tecnologia · Internship -September 2022 - May 2023 • MySQL | Java | JavaScript

IT Young Apprentice

Linx - May 2022 - September 2022
